ABOUT ME

My main fields of interest (both professionally and as a hobby) are systems architecture, administration, computer networks and cybersecurity. I refer to myself as hacker (in the original meaning of that word, but also as whitehat researcher).

I have experience in many stages of computer system lifecycle - not only in typical business roles but also as full-stack freelancer as well as all-in-one IT guy on festivals and in students' association. That gives me the advantage of being able to understand customer and business needs and manage resources (including time) with care. Another aspect of my career story - work in operations jobs allowed me to learn how to work under time pressure in disaster scenarios.

I'm advocating Bill Gate's words "I choose a lazy person to do a hard job because a lazy person will find an easy way to do it" - and really prefer to automate everything. I'm also a constant learner - not only mastering current skills, but also discovering new approaches and technologies.

PROFESSIONAL EXPERIENCE

Site Reliability Engineer, Cloud Engineer

Grand Parade part of William Hill

📅 July 2020 - Ongoing 📍 Krakow, Poland

I'm building tools and processes to ensure the reliability and availability of a private cloud that supports online gambling and gaming and processes Big Data. The technology stack includes on-premise Linux VMs (VMware vSphere), Docker containers (Apache Mesos, Marathon), AWS cloud (EKS and EC2), Apache Airflow, Sonatype Nexus and Gitlab. Infrastructure-as-a-Code paradigm is supported by Puppet and Terraform. I'm also part of on-call support that responds 24/7 to incidents within the platform.

Senior DevOps Engineer

Prescient Co

📅 October 2019 - July 2020 📍 Krakow, Poland

My job was to be a bridge between Development and IT Operations departments - maintaining systems to keep High Availability and security together with meeting business goals. Important parts of this chapter in my career are implementing Infrastructure-as-a-Code paradigm, introducing new operating system (Linux) and containerization systems (Kubernetes) into the existing ecosystem.

Linux Platform Engineer

Motorola Solutions Systems

📅 May 2019 - October 2019 📍 Krakow, Poland

As software developer in Dimetra Platform team, I was responsible for the development of management and deployment tools for Linux platforms, as well as virtualization using VMware and KVM solutions.

I was also responsible for the lab environment.

PROFESSIONAL SKILLS

Linux
Ansible
Python
Networks
Terraform
AWS

STRENGTHS

• Development

Python bash PowerShell awk
Perl SQL Go C# x86 assembly
LaTeX JavaScript

• Virtualization and containerization

VMware vSphere KVM (libvirt)
Docker LXC Kubernetes

• DevOps/automation tools

Ansible Puppet Jenkins Gitlab CI
Azure Pipelines Elasticsearch
Grafana NewRelic

• Cloud

Terraform AWS VMware Cloud

• Databases

MSSQL MySQL PostgreSQL

EDUCATION

Computer Science

Jagiellonian University in Cracow

📅 2014 - 2016

LANGUAGES

Polish
English

PROFESSIONAL EXPERIENCE (CONT.)

Platform Operations Engineer

Akamai Technologies

📅 July 2016 – May 2019

📍 Krakow, Poland

My responsibilities in Network Operations Command Center included responding to real-time issues with the entire Akamai platform - from routine hardware problems to global routing or capacity incidents which require immediate action. I participated in maintaining general network health, resolving configuration defects, performing network maintenance works and responding to outside communication with other NOCs and service providers.

Since 2018 I worked on senior level assignments which included approving potentially dangerous nonstandard operations, being part of incident coordination and deploying configuration changes. I also developed several software solutions that helped multiple departments in everyday work.

VOLUNTEER EXPERIENCE

System Administrator

Computer Science Students' Association - KSI UJ

📅 December 2014 – January 2018

📍 Krakow, Poland

My role as SysAdmin was to keep our network working and secure, maintain servers belonging to KSI including critical infrastructure (mail, DNS), develop applications that were used by the management board, and supervise the server room.

Another task of Administrator in KSI was to cooperate with network administrators of university.

Secretary of the Board

Computer Science Students' Association - KSI UJ

📅 October 2015 – October 2017

📍 Krakow, Poland

For 2 academic years I was also Secretary of the Board in KSI. As active member of board, I also participated in organizing various events on UJ like *Malopolska Noc Naukowców* (Night of Scientists) and *Festiwal Nauki* (Science Festival).

Chief Information Officer

Academic IT Festival - SFI

📅 December 2014 – July 2017

📍 Krakow, Poland

I was member of logistics team, Chief Information Officer and web developer involved in development of contest application (PHP, later Erlang) and DevOps (Git, CI).

I also acted as SysAdmin, being responsible for network infrastructure during the event and helpdesk engineer dealing with end users.

IT Coordinator

Theatre Festival "Zwierciadla"

📅 September 2012 - May 2014

📍 Lublin, Poland

"Zwierciadla" is a high school theater festival organized by students. Since 2013 I was responsible for its website and other IT and logistics related tasks like network configuration, helpdesk, coordinating multimedia processing and publishing etc.

That experience gave me an early opportunity to learn team work and responsibility in the face of deadlines.

OTHERS

- Layer2 and Layer3 network maintenance and management (Cisco, Juniper, HP)
- TCP/IP and higher level protocols debugging (Wireshark)
- security & whitehat hacking
- electronics

INTERESTS

- cybersecurity (*whitehat*-hacking)
- embedded systems
- electronics
- cloud computing
- amateur photography
- Japanese culture

GDPR
